

PROFESSIONAL SUMMARY

Versatile and forward-thinking **Computer Science graduate** with a robust foundation in **full-stack web development**. Proficient in building **secure, scalable applications** using **React, Node.js, Express.js, MongoDB, and JWT**. Skilled in designing **RESTful APIs**, managing **databases**, and implementing **authentication systems**. Technical expertise with **TypeScript and Next.js** to deliver **type-safe, high-performance solutions**. Strengthening backend capabilities with **PostgreSQL** while actively exploring **Generative AI (GenAI)** and **Retrieval-Augmented Generation (RAG)**. Skilled in **LangGraph, LangChain, vector databases** like **Qdrant** and **graph databases** like **Neo4j**, and agent orchestration protocols like **MCP** and **A2A**, for building **intelligent, modular AI systems**. Committed to **innovation, adaptability**, and **continuous learning** in the evolving tech landscape.

EDUCATION

- Kishinchand Chellaram College, Mumbai - 2022 - 2025 – **Marks: 9.7 (CGPA)**
- RADAV College – 2022 - 12th Std – Science - **Marks: 70%**
- St. John Convent High School – 2020 - 10th Std - **Marks: 85.4%**

PROJECTS

- SyedFaisal30**: My personal **portfolio** website showcasing all my **projects, skills, and experience** — built to reflect my journey as a full-stack developer.
- GenAI Developer**: **Expertise** in LangGraph, LangChain, RAG pipelines, Qdrant, Embeddings, MCP, A2A; also build some **terminal-based LLM apps** with tool chaining & HITL fallback.
- CricAllytics**: **AI-powered RAG** application delivering advanced cricket analytics, personalized player insights, and match stats using real-time data retrieval and LLM-based summarization.
- ChefGenie**: **AI-based RAG** application where user generate recipe, share their unique recipe via posts, and can get variety of recipes in three different modules.
- PTAI**: An AI-powered fitness app built with Next.js that delivers personalized workout routines and nutrition plans based on user inputs such as health metrics, dietary preferences, workout goals, and any allergies or restrictions.
- Fintrust**: Full-stack banking system built with the MERN stack and MySQL. It features secure customer and banker logins, email verification via OTP, JWT authentication, role-based dashboards, and complete transaction tracking.
- OfficeFlows**: Office management system with admin login, CRUD for departments/employees, dynamic location API, and server-side filtering using MERN stack.
- VPT**: A **MERN** stack web app that displays multiple videos on a single page with individual playback tracking, dynamic progress bars, and real-time user engagement monitoring in **TypeScript**.
- FastPiks**: A dynamic e-commerce platform using **Next.js, ShadCN UI**, and **Tailwind CSS**, ensuring seamless shopping with authentication and authorization features.
- Mystry Messages**: A user messaging platform built with **Next.js** and **TypeScript**, featuring secure user authentication, dynamic UI, and seamless message management.
- Video-Tube**: Backend system for video hosting and management, handling uploads, streaming, and interactions.
- Rest-Review**: Google OAuth-enabled restaurant review portal with React and Express.js, allowing restaurants to view and respond to customer reviews.

SKILLS

• JavaScript • TypeScript • React • Express.js • Node.js • Next.js • Next Auth • JWT • Redux • Tailwind CSS • ShadCN UI • Mongoose • MongoDB • MySQL • Python • Fast API • Docker • LangChain • LangGraph • RAG • Qdrant DB • Neo4j • LangSmith • MCP • A2A Protocol • Git • Java • Linux

CORE COMPETENCIES

• Web Development • Database Management • RAG Development • Project Management • LLM Orchestration • REST API Design & Security • Authentication & Authorization • AI Tool Integration & Prompt Engineering • Vector Database & Semantic Search • Containerization & DevOps (Docker) • Version Control & CI/CD (Git, GitHub) • Agile Methodology & Sprint Collaboration

EXPERIENCE

- Proficient in building AI-based **RAG applications** using LLMs, vector stores, embeddings, and advanced retrieval.
- Skilled in **Git and GitHub** with expertise in branching strategies, versioning, and resolving conflicts.
- Active contributor to **Agile sprints**, story estimation, backlog grooming, and CI/CD workflows.
- Developed scalable, maintainable **full-stack** applications using the **MERN** stack and modern tools.
- Dockerized** applications for consistent development, deployment, and environment parity.

HOBBIES: Cricket, reading, watching sports (Cricket, Football, Tennis)
